

KOVINO PLASTIKA LOŽ

QUALITY MANAGEMENT SYSTEMS AND ENVIRONMENTAL MANAGEMENT POLICY

Our basic principle is global administration and constant improvement of quality and environmental management.

We administer and manage business processes, develop and adapt the business system, set criteria that lead to success and competitiveness.

We attempt to satisfy the wishes of our customers, starting from their demands and expectations. On this basis, we are building a long-term partnership and cooperation.

Our further development is built on knowledge and innovation, with which we also increase the business performance of our customers.

We develop a culture of values and an entrepreneurial attitude for all employees. The goal is to encourage improvement processes, teamwork, active participation at all levels of the company, and the rewarding successful ones.

With the help of profit centres, we want to fully manage the funds and develop key processes in a way that will preserve and improve the competitiveness of products and services, taking into account the commitment to careful use of energy products, raw materials and environmental protection.

We care for a healthy and safe working environment.

Given that we are located in a geographically sensitive area, we are investing resources and knowledge into reducing the negative impacts on the environment, and we are targeted to handle important environmental aspects.

We commit ourselves to inform buyers, suppliers, employees, relevant government institutions and the public about our activities and guidelines of operations.
